

We're looking for families with toddlers who have hearing loss to participate in our language development study

Eligibility

Age

Child is less than 19 months old

Hearing

Child has hearing loss in both ears

Devices

Child uses a hearing device in both ears

Language

Primary caregiver understands spoken English

Incentives

Money

Up to \$950 for your family's time over the 24-month study

Online

Activities occur over video calls during a time that is convenient for you

Development

Learn how to support your child's language growth and development

iPad

Receive an iPad (and potentially cellular service) during your participation

About

The Early Intervention Research Group (EIRG) exists to enhance the early development of infants and toddlers. Our mission is to empower families and providers to use evidence-based early intervention strategies to maximize child development.
