

We're looking for toddlers with hearing loss to participate in our language development study

Eligibility

Age

Child is younger than 19 months old

Hearing

Child has hearing loss in both ears

Devices

Child uses a hearing device in both ears

Language

Primary caregiver understands spoken English

About the Nationwide Study

The Early Intervention Research Group at Northwestern University is seeking to understand how to **how to best support language and communication development** in children with hearing loss.

You and your child will complete monthly **virtual language assessments** for 24 months, and half of families who participate will receive **6 months of speech-language therapy**.

For Families

Learn how to support your child's language development

Receive an iPad (and potentially cellular service) during your participation

Complete study activities via Zoom at a time that is convenient for you

Receive up to \$950 for your family's time over the 24-month study

Take a 2-minute survey to learn more!
